NORRES Schlauchtechnik at the Nuremberg POWTECH 2011

NORRES product portfolio on show to an international audience

The POWTECH fair is *the* international forum for the latest developments in mechanical processing technologies. As in several previous years, NORRES Schlauchtechnik will attend as an exhibitor. POWTECH takes place in Nuremberg, Germany, every 18 months and is an ideal meeting place for process technicians, process engineers, production managers and scientists to find out more about the latest trends in the industry and exchange views and ideas. This year, POWTECH will be staged from October 11 to 13.

Representatives of many different industries – from pharmaceuticals & food through ceramic & glass to wood & paper – will get together at **POWTECH** on three days in mid-October. As the world's leading exhibition for mechanical processing technologies and instrumentation, **POWTECH** offers a unique and comprehensive range of products combined with a highly topical supporting programme.

Visitors to the NORRES Schlauchtechnik stand will have a chance to glimpse a broad selection of industrial hoses and hose systems for bulk material transport and suction, e.g. of powder and pellets. The NORRES team will naturally be pleased to provide information and advice directly, for instance on:

- The permanently antistatic **PUR AS** hose family with electrostatic discharge capability
- The patented **NORCONNECT 231** and **NORCONNECT 232** coupling systems
- The highly flexible **NORFLEX® PUR** all-round hose
- Familiar, classic hoses alongside several exciting innovations
- Plus numerous other products in our successful range

Visitors to the trade fair are also invited to take a look at the new NORRES catalogue, the "Industrial Houses Manual IH3". With its fresh, innovative design, this latest edition of the NORRES product catalogue provides a succinct and clearly structured overview of our entire hose range. Copies of the catalogue will be available to all interested persons at the NORRES **Stand 6-468** in **Hall 6** at the Nuremberg POWTECH **from October 11 to 13, 2011**.
