NORRES shows a wide range of products at WIN fair

WELLFLEX® cable protection conduits get newest VDE certificate

NORRES WELLFLEX® protection conduits PVC 111 and PUR 118 are checked and certificated successfully approved to DIN EN 61386-1 und DIN EN 61386-23 (flexible rigid conduit systems for electric energy and for information).

Of the WELLFLEX® protection conduits as well as the wide range of products the international trade visitors could convince themselves at the WIN in Istanbul which just ended successfully.

From now on the highly flexible plastic conduit WELLFLEX® PVC 111 and the extra highly abrasion-proof polyurethane protection conduit WELLFLEX® PUR 118 of NORRES are VDE certificated. The generally accepted VDE symbol stands for product safety of the regarding electric, mechanic, thermic, toxic and sundry safety. It indicates conformity with the VDE standards or European or internationally harmonized standards and confirms its compliance with the protective requirements of the applicable EC Directives by the VDE testing and certificate institute. An integral part of holding and granting the VDE mark are regular factory inspections and product surveillance, which guarantees a uniform and constant product quality.

Both enormously flexible cable protection conduits have a plastic coated spring steel wire, are gas and liquid tight and are characterized by good resistance to chemicals, UV and ozone. The robust WELLFLEX® PUR 118 is in addition oil-resistant and has very good low temperature flexibility (better than comparable ester-polyurethanes). The cable protection conduits are applicable to electric installations, in switchboard plants, switch cabinets and mechanical engineering as well as in robotics.

Of the wide range of products in the field of cable protection systems the international trade visitors could convince themselves at the WIN in Istanbul which just ended successfully. The
