

## Air pressure/ water hose

### Applications

- for medium-duty applications in industry, workshops and on construction sites
- Suitable for the transport of water, air and compressed air containing oil

### Properties

- particularly robust, thick-walled and flexible
- resistant to oil mist

- construction cover resistant to ageing, ozone, UV and weathering
- maximum operating pressure: air 10 bar, water 16 bar
- burst pressure 54 bar
- according to the norms EN ISO 1307:2008 and DIN 20018

### Temperature Range

- -30 °C to 50 °C

### Design

- inner tube made of thermoplastic elastomer
- outer layer made of thermoplastic elastomer
- smooth interior and exterior
- polyester plies

### Delivery variants

- black inner tube, black exterior wall

Overpressure and underpressure are recommended threshold operating values, products can be subjected to higher loads upon request. The bending radius is measured through the inside of the hose arch. The right to make technical modifications is reserved. All values determined at 20 °C and are approx. data.
