

# NORPLAST® 4460 QUADRIFLEX

Thermoplastic suction hose

## Applications

- for industrial water, wastewater and dung
- Has been used to full satisfaction in the public sector and in agriculture for years
- Due to its smooth outer wall, very suitable for use in water treatment plants, water reservoirs, slurry pits, etc.

## Properties

- Has an oval spiral instead of a round one

- according to the norm EN ISO 1307:2008
- Vacuum up to 0.9 bar

## Temperature range

- -15°F to 140°F

## Design

- soft PVC inner layer

- PVC outer layer
- smooth construction cover
- rigid PVC spiral
- smooth inner tube

## Delivery variants

- orange inner tube, orange exterior wall, anthracite spiral (standard)

Positive and negative pressure ratings are the recommended maximum operating values. Products can be manufactured to meet higher operating values upon request. The bend radius is calculated from the center of the hose in an arched position. Additional information at [www.norres.com/us/technology/](http://www.norres.com/us/technology/). NORRES reserves the right to modify technical data at any time. Technical data based on tests at 68°F and are approx. values. Proper use and maintenance of NORRES hoses is the sole responsibility of purchaser and ultimate user of the product. The individual conditions, applications and the number of variables make firm recommendations technically impossible. This information is intended as a general guide only.
